

# ASSIGNMENT-1

NAME	Anitha.T
ZONE	8
COLLEGE	GANESH COLLEGE OF ENGINEERING
TEAM ID	NM2023TMID00452

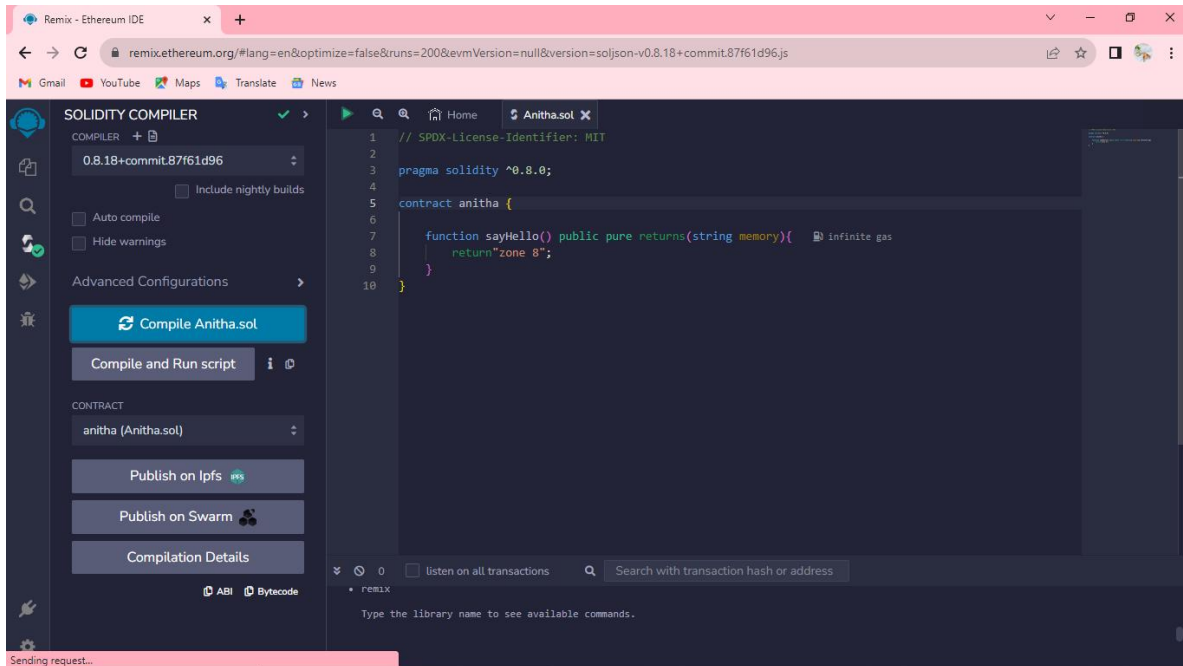

## 1. Go to the chrome and open remix platform

## 2. Open the remix page and create a new file

### 3. In that newly created file, create a program to return your string, "Zone name"

PROGRAM:

```
// SPDX-License-Identifier: MIT
pragma solidity ^0.8.0;
contract anitha {
    function getZoneName() public pure
    returns (string memory) {
        return "Zone name";
    }
}
```

### 4. Save the program and compile it to get the ABI and Bytecode

**ABI:**

```
[
  {
    "inputs": [],
    "name": "sayHello",
    "outputs": [
      {
        "internalType": "string",
        "name": "",
        "type": "string"
      }
    ],
    "stateMutability": "pure",
    "type": "function"
  }
]
```

## BYTECODE:

## 5. Finally Deploy it to display the output

The screenshot displays the Remix Ethereum IDE interface. The top bar shows the URL `remix.ethereum.org/#lang=en&optimize=false&runs=200&evmVersion=null&version=soljson-v0.8.18+commit.87f61d96.js`. The left sidebar contains the 'DEPLOY & RUN TRANSACTIONS' panel, which shows the contract 'anitha - Anitha.sol' selected. The 'Deploy' button is highlighted. Below it, the 'Transactions recorded' section shows a list of transactions, including one for 'anitha.sayHello()'. The 'Deployed Contracts' section shows the contract 'ANITHA AT 0XD91...39138 (MEM)' with a balance of 0 ETH and a 'sayHello' button. The 'Low level interactions' section shows the 'CALLDATA' field.

The main editor displays the Solidity code for the 'anitha' contract:

```
1 // SPDX-License-Identifier: MIT
2
3 pragma solidity ^0.8.0;
4
5 contract anitha {
6
7     function sayHello() public pure returns(string memory){ infinite gas
8         return "zone 8";
9     }
10 }
```

The bottom panel shows the execution details for the 'sayHello' function call. The 'CALL' section shows the transaction details, including the 'from' address, 'to' address, 'execution cost' (715 gas), 'input' data, 'decoded input', 'decoded output', and 'logs'.

At the bottom left, a status bar indicates 'Sending request...'.
